

GRADES AT REED

Since its founding Reed College has adhered to a distinctive educational philosophy, a critical component of which is the evaluation and grading of student academic work.

ACADEMIC RIGOR

The average GPA for all students in 2011–12 was 3.11 on a 4.00 scale. This figure has scarcely changed in the past 28 years. **Reed has experienced little or no grade inflation.** During that period, only ten students have graduated from Reed with perfect 4.00 grade averages.

2011–12 GRADUATING CLASS

10% graduated with a GPA of 3.73 or higher
25% graduated with a GPA of 3.47 or higher
Average GPA—3.17

The absence of grade inflation at Reed reflects the rigor of the academic program and the high standards set by the faculty, rather than any deficiency in the quality of the student body.

GRADING POLICY

Students are encouraged to focus on learning, not on grades. Students are evaluated rigorously, and semester grades are filed with the registrar, but by tradition, students do not receive standard grade reports. Papers and exams are generally returned to students with lengthy comments but without grades affixed. There is no dean's list or honor roll, and Reed does not award Latin honors at graduation.

THE ENTERING CLASS 2012–13

Reed's average SAT scores are among the top dozen or so of all liberal arts colleges in the nation.

Average SAT (critical reading, mathematics, and writing)—2,076

Average high school GPA—3.95

SCHOLARSHIP AND FELLOWSHIP AWARDS

Over the years, Reed students and alumni have won:

- 31 Rhodes Scholarships (the second highest from a liberal arts college)
- 87 Fulbright Scholarships
- 64 Watson Fellowships
- 25 Mellon Fellowships since 1983
- 148 National Science Foundation fellowships

Eighteen members of the National Academy of Sciences are Reed alumni. Nearly 10 percent of Reed alumni have been, or currently are, CEOs or presidents of private companies.

RANKINGS OF GRADUATES

Reed ranks fourth in the nation among all institutions of higher learning in the per capita production of future Ph.D.s in all disciplines. It ranks third in social sciences, fourth in science and math, and fifth in humanities and art. Among more specific fields, it ranks second in life sciences, humanities, and social sciences (not including psychology, education, and communications); and third in physical sciences.
